Disasters:

Declaration Number

FEMA-1792-LA

Narratives

Disaster Damage:

Hurricane Gustav caused major wind and flood damage throughout the state, from the southern coastal parishes through central and north Louisiana. Two weeks later, Hurricane Ike hit sending tidal surges across the State's southern coastal communities. Ike exceeded storm surge caused by hurricanes Rita and Katrina. More than 1.9 million Louisiana residents were forced to evacuate for hurricanes Gustav and Ike. Many of these residents were unable to return to their homes and jobs for a number of days, and a large number of residents whose homes remain unlivable continue to need short-term shelter and longer-term transitional housing. The State was forced to evacuate 30,000 critical transportation-need residents, including 10,400 medical evacuations. This represented the largest medical evacuation in U.S. history. The State was also left with 1.5 million cubic yards of debris from Hurricane Gustav along federal and state highways. Approximately 150,000 to 300,000 homes experienced some level of damage in the storm; more than 12,000 homes were flooded. Preliminary estimates show that approximately $2 to $7 billion in residential property loss was incurred. Even homes built to the Federal Emergency Management Agencies Advisory Base Flood Elevations flooded as a result of this storm. The state also estimates more than $1 billion in public infrastructure damage. The state has spent more than $400 million in emergency response and immediate recovery activities. Fifty-three (53) of the States sixty-four (64) parishes were included in the President's disaster declaration for individual assistance; all 64 parishes were declared for public assistance. The two storms caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. More than 120,000 homes received some damage.

Recovery Needs:

A large percentage of the State's educational facilities received damage from the storm. Preliminary estimates indicate that there was at least $100 to $150 million in damages to the primary (including pre-K) and secondary education facilities. While

While funding to address these damages is authorized under current law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical infrastructure. To repair this critical infrastructure, $119 million would be needed for Louisiana (Gustav - $53 million; Ike - $66 million) through the Federal Highway Administrations Emergency Relief program.
Preliminary estimates indicate approximately $1.7 billion in uninsured housing losses, with over half of that amount likely being homeowners. Hurricanes Katrina and Rita have taught us that repair costs generally outstrip insurance proceeds.
Initial damage models based on flood and
wind damage vary widely, but have a midpoint between $3 and 4 billion dollars. Half of this damage may be uninsured losses due to uninsured
and underinsured properties.
With losses of housing stock concentrated in certain communities, Louisiana could have up to $1.5 billion in uncompensated housing losses. Of this, the State will need to design programs in concert with local communities to rebuild and make up this loss. The State will develop the programs in concert with local communities to rebuild and make up this loss.
Based of the 2007 Summary of Agriculture and Natural Resources by the LSU Agriculture Center and NMFS Revenue Data, the seafood industries experienced nearly $250 million in revenue loss as a result of the two storms. Even prior to hurricanes Gustav and Ike, Louisiana,s fisheries were struggling to recover from more than $528 million in losses resulting from hurricanes Katrina and Rita in 2005. Hurricanes Gustav and Ike moved across the central Gulf of Mexico through some of the nation's most valuable and productive fishing grounds at the start of the state's most valuable shrimp season.

Overall Progress Narrative:

Overall Progress Narrative:
April 1, 2023 to June 30, 2023
The State of Louisiana, Office of Community Development continued to move both projects and programs to completion. Total grant expenditures over the quarter were $497,491.91. Program managers continue to work with grantees to reallocate remaining funds from completed projects and programs to existing programs or new initiatives. As the number of active state-run programs continue to decline, project and program managers focus on closing out the remaining projects and reallocating funds as programs reach completion.
Parish grantees continue to amend allocation budgets due to projects coming in under budget or acquiring other funding sources and other projects deemed no longer viable due to permitting or other issues. The budget reallocations are resulting in additional funds for existing projects and alternate projects being moved up to priority status. Among approved parish projects representing approximately $558 million in funding, nearly $548 million or 98% has been expended among 56 parish grantees.
Management and close-out staff continue to systematically track project completions and notify grantees that close-outs are due. As of the end of this quarter, 651 Gustav/Ike (G/I) activities have been closed. Close-out efforts at the local level is also enabling grantees to reallocate funds as needed to existing disaster recovery projects, in particular drainage, sewage and road repair that may require additional mitigation or adjustments once the work needed can be thoroughly assessed.
For all activities in this QPR with no narrative, there were no expenditures in this quarter.
ACTIVITY THIS QUARTER:
66GIAD1001 - State Level Admin
Supports the administrative work conducted to implement disaster recovery projects funded with these resources. This includes technical assistance as well as general administrative costs.
17PARA2106-Bridge Repair,LMI Group II-EBR
Construction payment to Entergy to de-energize transmission line.
39PARA3401 - Parish-wide Drainage - Pointe Coupee
Expenditures for engineering services.
50PAAD1001 - St. Martin Parish
Expenditures for grant consulting services.
65RHSD1201 - Soft Second Mortgage Program
Expenditures this quarter are for admin salaries for activity delivery.
65RPGS1501 - Compass Group
Expenditures for program delivery in support of the Affordable Rental Program, including the Cane Pointe project.
32MIPS2302-Sewer Collection System-Springfield
Expenditures are for engineering services.
53MIPC3201 - Roseland Community and Resource Center
Expenditures are for grant management services.
58BEDI7201 - Fort Polk - Vernon
Expenditures are for grant management services.

Activity Description:

The proposed project consists of the installation of a permanent diesel or natural gas powered generator which will be placed on a concrete slab and will be equipped with a 200 gallon fuel tank. The generator will also be equipped with an automatic transfer switch that will monitor power at the Community Center and will start the generator automatically should power be lost. Demolition or structural modifications will be required to facilitate the connection of the automatic transfer switch to the Church Point Community Center's existing control panel. The proposed improvements shall serve to prevent such an occurrence during future hurricanes. Topographic surveys will be required to accurately locate the existing structures, equipment, utilities, and site elevations to properly design the proposed project.

Location Description:

104 E. Darbonne Street, Church Point, LA 70525

Activity Description:

The proposed drainage improvement project includes channel restoration and reshaping, and removal of trees, brush and fallen debris in the West Fork of Caney Creek for a distance of 7.8 miles. The project will restore the hydraulic capacity in the stream and reduce future flooding in the respective watersheds, including Oakdale. Trees will be removed by cutting and/or grinding in place and spreading the chips onsite as mulch. The objective of the project is to increase the capacity of the channel to alleviate future flooding in the southeastern portion of the City of Oakdale.

Location Description:

Caney Creek, Oakdale, LA 71463 - Allen Parish

Activity Description:

Create housing program in Ascension Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. Teh assistance will have the objective to return individuals to decent, safe and sanitary conditions.
Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over $8.5 billion for the Road Home program; additionally $850 million dedicated to mitigation activities ($750 through HMGP and $100M through CDBG) for a total of approximately $9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned $850 million plus $879 million that have gone to Road Home elevations plus $880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of $2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

Location Description:

Throughout Ascension Parish, LA

Activity Description:

Purchase of a 247.5 acre property with existing mulit-use Expo center in Gonzales, LA. The purpose of the Lamar Dixon facility is to provide the community with a multi-use events facility - with in the past ha been used primarily as an equestrian and 4-H activites as part of the LSU Extension Program. This is a privately owned facility, leased to the parish. Were the facility not owned and managed publicly by the parish, it would a major loss both economically and culturally.

Activity Description:

The Waterworks Improvement project, intended to increase water system storage capacity, has two phases: installation of additional million gallon tank, and installation of a new MGD filter systems including underdrains, media and controls as well as the removal and replacement of interior block, media and controls, and interior valves and piping.

Phase One is the purchase and installation of a second groundwater storage tank, to be located adjacent to the Waterworks plant with the capacity to hold an additional one million gallons for a total of 3 MGD; the current storage capacity is 2 MGD. The additional tank will give the parish an ample supply of water, capable of sustaining the entire populace and area industries in the event of any future weather events that affect the potability of water from Bayou Lafourche. These improvements will improve the health and welfare of the community while supporting community resiliency by assuring that clean water is always available.

Phase Two includes the installation of a new clarifier system on the old storage tank to increase its filtering water capacity to 7 MGD, as part of the influent system. Due to the age of the filter systems, some of its capacity to treat the influent efficiently has declined. Currently the system treats 5.5 to 6 million gallons per day. The replacement of the filters will increase the capacity back to 7 million gallons per day as was the original design.

Activity Description:

Three target areas have been identified for waterline improvements: Belle River, Belle Rose and Paincourtville. Improvements to the water system will enhance public safety by connecting to fire hydrants, which currently cannot connect to the existing undersized water lines. Broken lines will also be repaired in the target areas resulting in inceased efficiency of delivery, maintenaince of the correct water pressure, and reduced water line leakages. These action will reduce the cost of property insurance for the residents in the trageted areas.

Activity Description:

During Hurricane Gustav, Assumption Parish's community sewage systems were inoperable as a result of the downed power lines, and subsequent loss of electric service. As a result many community systems experienced an overflow of backed up sewage.
Additionally, the residents of the Peterville and Tyler Lane neighborhood are currently experiencing public health issues related to the improper treatment of wastewater. The Peterville area is in violation of State Public Health Codes as a result of raw sewage emptying into open ditches.

The inadequate disbursement and flow of individual septic systems has resulted in raw sewage flowing into residences and infiltrating local drainage outlets, exasperating an on-going public nuisance. The proposed project includes the emptying of all existing private septic tanks, backfilling and complete abandonment of individual septic systems as homes are tied into a community package plant. Improvements will include an installation of 3,800 linear feet of 8 inch gravity sewer lines, 12 pre-cast manholes, one lift station with pump, and one 30,000 GPD package extended aeration treatment plant. Houses will be connected to the proposed sewer main by 2,000 linear feet of 4 inch service laterals as required.
This project rehabed 48 residential structures.

Activity Description:

The parish is allocating CDBG-DR funding to construct a new public community center that will provide greater opportunity for the general public, particularly those with low to moderate incomes, to participate in civic activities and community events. The Gustav/Ike disaster highlighted the need for such a facility. During the Hurricane this isolated community was cut off from rescue attempts, as most of the essential personnel were hunkered down in Napoleonville. Following the storm there was no central location to distribute food or water. With electrical service out of commission, there was no ability to conduct a needs assessment for the residents who remained in their homes. In addition, without electricity to run emergency generators, Parish and community officials were unable to provide limited basic services to the residents needing recovery assistance. When essential personnel were able to initiate recovery efforts with the residents, there was no facility of adequate size to host assistance programs, or to distribute food, water, ice and medicine. Without a centralized, gathering location available to host informational public meetings, this hindered the Parish's ability to communicate recovery operations and directives. Bayou L'Ourse is the most remote and isolated portion of Assumption Parish, surrounded by water, swamps and sugar cane fields. This small community drew survivors seeking assistance and information from other isolated parishes, which were equally cut off from larger population centers, As is the nature of rural communities with extended families, the Bayou L'Ourse community was willing to offer its support to other Louisianans needing help.
This is an urgent need project in accordance with criteria for national CDBG objectives in Section 570.483 of Title 24, regarding area benefit activities that are designed to meet community development needs having a particular urgency: the activity is designed to alleviate conditions that pose a serious and immediate threat to the health or welfare of the community, that are of recent origin or recently became urgent; and the unit of

local government is unable to finance this activity on its own. The number of beneficiaries is 2,788, the average number of persons per household is 2.73, and the LMI ratio is 38.2%.
The proposed project will enhance and support the parish's recovery, resiliency and revitalization goals by improving the existing recovery efforts. Assumption Parish officials embrace the goal of recovery from the immediate effects of a major storm by returning to normal operations as soon as possible, and thereby, having in place the resources and infrastructure to facilitate the residents' return home. In turn, residents are able to direct their own efforts and energy to returning home and resuming their daily lives confident in knowing that their homes, community and jobs are intact. The overall goal is to minimize the adverse effects of a natural disaster while enabling residents and businesses to return home and resume their activities with little downtime. Since the parish currently lacks the adequate facilities to provide cultural and recreational programs for the public, the community center provides a central location for educational, governmental and cultural activities supporting the sustainable components necessary for a healthy community.

Activity Description:

Generators will be installed at the Parish School Board headquarters, and at 5 Fire Districts, to support emergency recovery and resiliency efforts.
The Critical Infrastructure generator project will not only improve the existing recovery efforts, but it will put the Parish in a much better position in advance of future major storms. The project will enhance and support the Parish's recovery, resiliency and revitalization goals by upgrading its public facilities, improving the health of the neighborhoods and the quality of life for its residents, and advancing economic development. These generators will support and enhance the critical needs of the Fire Departments and Assumption Parish School Board by expediting their emergency services operations and school board operations to resume operations immediately after major disaster events. As a result, the parish's economy can rebound quickly, without an interruption of productivity. Another added benefit is that parish resources will be used to address immediate impacts to specific areas without having to address the public safety and school board operations. The target area will become cleaner and healthier to current and future residents ensuring neighborhood stability.

Activity Description:

This project consists of drainage improvements to Turner Canal, beginning at its intersection with La. Hwy. 115, thence extending a distance of approximately 2.8 miles in a southerly direction. The project also includes drainage improvements to an un-named tributary of Turner Canal, beginning at its intersection with Turner Canal, thence extending a distance of approximately 2,600’ in an easterly direction to the corporate limits of the City of Bunkie. This project will increase the hydraulic capacity of the Canal. The probability of flooding in the area will be significantly reduced.

Location Description:

Bunkie, La. - Avoyelles Parish

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

This project involves the reconstruction of the Lightning Street Bridge to adjust the elevation. The existing bridge spans approximately 76 feet and consists of precast concrete deck panels, precast concrete pile caps with timber pile substructure. The timber piles are in poor condition with substantial physical deterioration. Proposed improvements consists of the demolition of the existing bridge in its entirety and replacement with a new bridge structure consisting of drilled concrete shaft piling with precast concrete caps, deck panels and guardrail. The existing concrete revetment under the bridge will be replaced with new cast in place revetment. An existing water main attached to the existing bridge will be replaced with a new water main to be attached to the new bridge structure. The new bridge superstructure (caps, deck and guardrail) will be located above the 100 year base flood elevation as established by FEMA Flood Studies for the City of Sulphur incorporated area. Street approaches for the bridge will be rebuilt/raised to accommodate the new higher bridge.

Location Description:

Lightning Street, Sulphur, LA

Activity Description:

The Public Works department also took temporary measures such as taping the windows, using plywood and plastic coverings to aide in prevention of damage to the facility during Hurricane Ike. The water plant received minor wind damage from the storm. However, because the damage was minor, the insurance deductible was not met and the necessary repairs were made by Town crews. Although the damage was minor, the Town realized that hardening the facility would provide better protection of the water plant during future storm events. If the plant is rendered inoperable due to a storm, the residents of Vinton would be without a source of potable water. The construction of a new equipment shed at the water plant will provide protection to the water pump. The new galvanized steel framed shed will accommodate eight trucks/tractors providing protection from the wind and rain produced by future storms.
Description of Construction Involved:
Construction involves the installation of 8 mil thick tinted, polyester window film that will resist winds and heat loads on the larger windows at the Town Hall and at the west front entry of the Police Station. The existing glass will be removed; film adhered and then reinstalled in the existing aluminum frames.
Improvements at the water plant will include an upgrade to the building with partial replacement of the existing wood frame, replacement of exterior metal siding with new prefinished metal siding, new gutters and downspouts, removal of exterior metal louvers, replacement of all windows and doors with aluminum storm resistant windows and galvanized hollow metal doors and frames, pour concrete topping over the existing concrete slab for leveling purposes, replacement of existing wood cabinets with plastic clad cabinets, provide cement board interior wall finish, and open exposed framing in attic to be partially replaced to facilitate

structural requirements. The roofing will be removed and then reused.

Location Description:

1200 and 1201 Horridge Street, Vinton, LA 70668

Activity Description:

The Parish completed extensive research with all of the Fire Districts located within the unincorporated areas of the Parish to determine the need for new wind rated bay doors. The need is tremendous. The total list of bay doors needed is sixty five. The current budget for the project will only allow for the installation of ten of the sixty five bay doors. The list of doors requested was reviewed and prioritized. The current budget for the project will allow for the installation of new bay doors at the following locations:
• 1738 Sutherland Road - 2 doors
• 1000 Topsy Road - 2 doors
• 134 Fire House Road - 3 doors
• 2888 Cardinal Lane - 2 doors
• 5599 Hwy 14 East - 2 doors
• 2991 Gauthier Road - 6 doors
• 9253 Gulf Hwy - 2 doors
• 789 W Houston River Road - 4 doors
• 1786 Hwy 90 - 2 doors
• 3495 Hecker - 4 doors
All bay doors at each station will be replaced to ensure the entire facility is secure from wind and water damage.

Activity Description:

The purpose of the project is for the hardening of the Parish Animal Services Facility. In order to provide protection to the animals housed at the Animal Services Facility during Hurricane Gustav, parish employees were required to relocate the animals to alternate facilities. The hardening of this facility will provide the necessary protection required to safely accommodate the animals and Parish staff required to care for the animals during future storm events.

Activity Description:

The roads within the Parish proposed for improvements are in a deteriorated state and have been identified to be improved as either rehabilitation (patch and overlay) or new construction (road base construction and overlay). Parish roads that have been identified as rehabilitation are roads that have deteriorated riding qualities where cracking and previous patch jobs have degraded the pavement enough for traffic to substantiate reducing speeds. Certain areas of these roads require high levels of maintenance. These roads are proposed to have selected areas of patching and/or leveling and complete overlay.

Location Description:

Various Parish Roads, Cameron Parish, LA

Activity Description:

This project consists of upgrading the existing pump station facility, for the Town of Jonesville using funds from the Office of Community Development (OCD) Disaster Recovery Unit (DRU). The Town of Jonesville is protected from floodwaters by a ring-levee and a Pump Station. During heavy rain events, the water level in Little River rises and causes back flooding which floods the Town's streets, residents, and sewer system. The Pump Station removes rain water inside the ring-levee and conveys the storm water to Little River through an existing channel. The existing Pump Station contains an existing metal building, discharge pumps, pump discharge pipes, and gravity discharge pipes with cast-iron slide gates.

The purpose of the project is to increase the station's capacity for gravity discharge; thereby, enabling the Pump Station to reduce flooding issues within the Town. Improvements will include installing two (2) 108" diameter RCP gravity drainage pipes with cast-iron slide grates, anti-seep collars, grading and related site work. The slide gates will allow the option of gravity drainage during smaller rain events, and will close to allow the activation of the pumps during heavier rain events. In addition, the gates will prevent backwater flooding from entering the pump station.

Location Description:

West Park Street @ Ring Levee, Jonesville, LA 71343

Activity Description:

During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

Activity Description:

Fifty-seven (57) bridges in East Baton Rouge Parish are currently rated four (out of 9) or below, a marginally poor to critical condition warranting major rehabilitation to replacement, or closure. Nineteen (19) of these fifty-seven are load rated to 15 tons or below for safety reasons and are not considered adequate for heavy trucks, traffic associated with heavy vehicles utilized by first responders (fire trucks, debris movers…), garbage trucks, or school buses. These bridges are mostly structurally supported by timber. Claycut at Dawson Creek, Greenwell Street at Roberts Canal and Milldale at Beaver Bayou are some of the aforementioned bridges. These bridges are considered structurally inadequate to withstand the forces associated with surge waters and riverine flooding from storms such as hurricanes. The possibility of a failure occurring on one or more of these bridges during a future storm event such as a hurricane, would create an unnecessary and dangerous burden on those trying to evacuate or service the area. New bridges will be all concrete and surge resistant and structurally superior to what exist today with new approaches to handle any type of vehicle that may be subject to crossing during an evacuation or emergency situation.

It was also noticed bridges with a timber substructure pile configuration tended to “hang-up” more debris increasing the likelihood of upstream flooding. These bridges have notable hydraulic grade jumps (increase in flood water surface elevation) at the upstream side caused by constrictions in the stream channel at the bridge locations. During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and

along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

For these structures, it will be necessary to conduct a complete topographic survey, create a comprehensive design study, and prepare plans and specifications to construct a new and functional bridge. These proposed bridge improvements will not only increase the load capacity and safety of each bridge but will also aid the parish in the economic recovery of Hurricane Gustav. Increasing the bridge spans will increase their hydraulic capacity and reduce the upstream impoundment of storm water by allowing it to flow more freely and recede at a much quicker rate during future events of storm and riverine flooding.

The target structures for this project, shown in the attached Project Map, include the geographical areas of these bridges. No acquisitions are expected to be required for these projects. All improvements will be completely within the existing right-of-ways of East Baton Rouge Parish; however temporary construction servitude may be required. East Baton Rouge Parish will retain ownership of the replaced bridges and approach spans and be responsible for the future inspection and maintenance of the proposed replacements. The replacement of this bridge is expected to reduce the cost of maintenance; therefore, no additional funds will be necessary for maintenance following these improvements.

Location Description:

8232 Greenwell Street, Baton Rouge, LA 70812

Activity Progress Narrative:

Reduce budget/obligation as part of closeout process, PAE work is complete per Michelle Smith/PAE, email dated 4/26/2023. Moving the remaining dollars of $2,325 to 17PARA2104 by separate request. The reduction of the budget and obligation of $2,325.00 changed budget and obligation from $2,658,387.96 to $2,656,062.96.

Activity Description:

The RDA is offering a reimbursable, matching grant program as an incentive to owners of buildings ans small businesses to improve facades within the indentified Target Areas (see map). This is a matching grant for funds spent on improvements to commercial properties that are visible from the street. Eligible facade improvements may include removing old facade structures, installing new and replacement awnings, canopies, and signs, landscaping, and performing other improvements in a manner consistent with applicable regulations, codes and ordinances and the adopted Community Improvement Plan for the area, if applicable.

Location Description:

Across East Baton Rouge, LA

Activity Description:

The proposed Urgent Need Generator Project consists of the installation of natural gas powered generators at several locations throughout Evangeline Parish.
Location #1- Pine Prairie Lift Station- permanently installed 60 kW generator at the only sewer lift station located at 305 Holly Street in Pine Prairie to provide backup power in order to pump sewage into the holding pond where it can stay until power is restored. The target area for this project is made up of 866 persons, of which, 434 or 50.1% are of low to moderate income.
Location #2- Turkey Creek Well #1- Permanently installed 60 kW generator at the largest well on the Turkey Creek water system located at 7482 Hwy. 167 North in Turkey Creek to allow water to continue flowing through the system following a power outage. The target area for this project is made up of 354 persons, of which, 151 or 42.7% are of low to moderate income.
Location #3- Ward 1 Industrial park Water Well- Permanently installed 30 kW generator to allow water to continue flowing at the largest well on the system in the Parish Industrial Park located at 1074 ½ Industrial Road in Ville Platte. The target area for this project is made up of the seven (7) industries located within the Industrial Park and the employees who work at these industries.

Location Description:

Throughout Evangeline, LA

Activity Description:

The Morgan Road Bridge Project will consist of removal of an existing 36 inch corrugated metal pipe and replacing it with a properly sized new structure. The objective is to ensure adequate flow designed to eliminate erosion. Replacing the existing structure with a new structure that is properly sized and designed, will eliminate or significantly reduce erosion during future storm events.

Activity Description:

This project consists of replacing a deficient/damaged major drainage structure and gate, to a restored sound, functional facility. The existing structure was severely damaged and degraded due to approximately 14” of rainfall that fell during the Ike-Gustav event. The objective is to restore and improve the hydraulic and structural capacity of the Bayou Macon Cut Off No.2 drainage structure. The expected results are a restored and improved drainage structure that will adequately drain Bayou Macon Cut Off No.2 which is an oxbow lake, and drain the drainage basin of 22 miles along Hurricane Bayou. An improved access to the structure shall allow better operation and maintenance.

Activity Description:

Located 20 minutes north of the city of Alexandria, Grant Parish has recently seen new growth with residents from Alexandria purchasing large tracks of farmland for megamansions and small subdivisions. During hurricane Gustav the parish received significant rain and wind damage. As part of the its Gustav/ Ike recovery program the parish s developing its first comprehensive plan, in an effort to focus growth in less flood prone areas, assess current and identify future capital projects needs, and preserve natural and agricultural resources.

Activity Description:

Create housing program in Iberville Parish (Unicorporate), LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. Teh assistance will have the objective to return individuals to decent, safe and sanitary conditions.
Iberville Parish is the third most impacted parish in the state, enduring considerable flooding to homes. Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over $8.5 billion for the Road Home program; additionally $850 million dedicated to mitigation activities ($750 through HMGP and $100M through CDBG) for a total of approximately $9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned $850 million plus $879 million that have gone to Road Home elevations plus $880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of $2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

Activity Description:

Create housing program in White Castle, Iberville Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. Teh assistance will have the objective to return individuals to decent, safe and sanitary conditions.
At this time we do not have detailed information on the parish housing programs, so to estimate the percentage that will be spent on mitigation activities we utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date we have expended over $8.512 billion for the Road Home program; additionally we will spend an additional $850 million on mitigation activities ($750 through HMGP and $100M through CDBG) for a total of approximately $9.362 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned $850 million plus $879 million that have gone to Road Home elevations plus $880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of $2.609 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. We rounded 28% down to an even 25% just to be conservative.

Activity Description:

Create housing program in Maringouin, Iberville Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.
'Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over $8.5 billion for the Road Home program; additionally $850 million dedicated to mitigation activities ($750 through HMGP and $100M through CDBG) for a total of approximately $9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned $850 million plus $879 million that have gone to Road Home elevations plus $880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of $2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

Activity Description:

During Hurricanes Gustav and Ike, the Sunshine WWTP became nonoperational, however the plant continued to receive wastewater from those drainage basins that still had electrical service for pump stations or had direct gravity flow connection to the treatment plant. As flow reached the plant on the front end, it continued to be routed through the treatment plant, although much of the equipment was inoperative and still discharged out the backend of the plant into Bayou Paul. The effluent was being discharged into the coulee that was at that time suffering from backwater flooding. The circumstances of continued discharge of sewage combined with backwater flooding resulted in sewage effluent being spread over the flooded topography. The situation did not improve until the swamps drained down thereby allowing Bayou Paul to also drain.
The construction of a new pump station and force main to discharge directly into the Mississippi River will provide a solution to the unsanitary situation that existed when flooding of the Bayou Paul basin occurs, by rerouting sewage effluent to the Mississippi River.

Activity Description:

Funding for the construction of a new 100,000 gallon elevated water storage tank for the Village of Rosedale. During Hurricane Gustav/Ike, the citizens of the Village of Rosedale were threatened with water system failure and insufficient storage capacity for fire protection during the storm and for approximately 10 days after the storm because of area wide power outages. The existing water system consists of a water well and a 7500 gallon hydro-pneumatic tank. A hydro-pneumatic pressure system is susceptible to mechanical or electrical interruptions. Although an auxiliary power generator is on site with the hydro-pneumatic tank, the Village continues to face reliability problems due to inherent mechanical deficiencies during disaster storm events and emergencies. It is the intent of the Parish to provide CDBG disaster recovery funds to assist the Village of Rosedale with the construction of a new elevated water storage tank.

Activity Description:

Nature of Project:
The purpose of this project is to provide standby emergency power for critical services in the City of St. Gabriel. The critical services covered will be three sewer treatment plants.

Description of the Problem:
During time of Hurricanes Gustav/Ike, The City of St. Gabriel, experienced widespread loss of electricity. With this loss of electrical power, the City lost its ability to treat raw sewage, posing an immediate threat and harm to the safety and welfare of the citizens of the City of St. Gabriel. There was also a loss in the supply of potable water. Due to the City's loss of critical systems during Hurricane's Gustav/Ike, maintaining critical services during power outages is essential to the health and safety of the community.

Activity Description:

Nature of this Project:

The purpose of this project is to provide standby emergency power for critical services in the Town of White Castle. The critical services covered here will be a Fire Station, Police Station, and a Community Center for the Town.
Description of Problem:
During time of inclement weather conditions, the Town of White Castle loses power throughout the Town. When this happens, the residents of the Town may require more services such as shelter and rescue as normal. This normally happens when hurricanes, tornadoes, or severe thunderstorms hit the area causing downed power lines and loss of power. Because the Town is limited in generator capacity, keeping critical services up during power outages allows for better resource management.

Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The scope of this project consists of purchasing and installing one (1) 60kWnatural gas generator and one (1) 150kW natural gas generator. Each generator will have its own automatic transfer switch to start the generator in the event of a power outage.

The water tower will require a 60kW generator. Currently there are three separate loads at this location. There are (1) Water Tower, (2) Fire Department, and (3) Maintenance Building. Each of these three loads has its own separate meter. This project would combine all three loads and reduce the meter count to one. This will allow the Town a cost savings in monthly fees. The project will see a cost savings due to the reduction of three separate automatic transfer switches for this one site to just one. This generator will service all three loads (1) Water Tower, (2) Fire Department, and the (3) Maintenance Building.

The second generator will be 150kW and will provide service to the Sewer Treatment Facility. This facility is currently fed from one main point of normal power.

All sites will require concrete slabs for generators and stands for the automatic transfer switches and any distribution panels.

Location Description:

Maringouin, Iberville Parish, LA

Activity Progress Narrative:

Activity Description:

Nature of Project:
The purpose of this project is to provide standby emergency power for critical services in the Village of Grosse Tete. The critical services covered here will be one critical sewer lift station for the Town and the Town Hall.
Description of Problem:
During time of inclement weather conditions, the Village of Grosse Tete loses power throughout the Town. When this happens, the residents of the Town are unable to dispose of human waste after an extended period of time. They are also unable to have potable water. This normally happens when hurricanes, tornadoes, or severe thunderstorms hit the area causing downed power lines and loss of power. Because the Town is limited in generator capacity, keeping critical services up during power outages is difficult, causing the local sewer system to get backed up.

Location Description:

Grosse Tete - Iberville Parish, LA

Activity Description:

This Church Street Drainage Canal is an existing open channel, earthen, storm water drainage waterway located in the southwest region of the Town of Maringouin. The channel drains approximately two (2) square miles within the southwest region of the Town of Maringouin and in a portion of Iberville Parish outside the Town's corporate limits. The drainage area includes approximately sixty (60) residential structures and two (2) commercial buildings. The canal discharges directly into the Maringouin Bayou which ultimately drains to the Atchafalaya Basin Floodway.
During Hurricane Gustav (2008) and Hurricane Ike (2008), backwater from Bayou Maringouin inundated the Church Street Canal causing the drainage canal to overflow its banks. The large water surge in the canal caused saturation and weakening of the earthen slope bank resulting in erosion and in some locations complete collapse of the channel's bank. Fallen trees and bushes along the channel bank weakened by the erosion and other debris in canal as a result of runoff from nearby neighborhoods restricted the flow in the Church Street Drainage Canal. The result being up to 2 (two) feet of standing water in the neighboring residential areas during these rain events. Even after the Maringouin Bayou subsided, the water level in the Church Street Drainage Canal remained high. Residents in the area were forced to wait up to three (3) days for the water level in the streets to recede.
The proposed improvement to the canal involves clearing and excavating (shaping) the channel and lining with articulated precast concrete block mats to stabilize the bank and prevent further erosion. Lining the channel with the concrete mats will increase the overall flow capacity of the waterway as well as reduce the frequency of maintenance for Town of Maringouin personnel. The lining of the canal will minimize flooding in the area similar to what occurred during Hurricane Gustav and Hurricane Ike in 2008.

Activity Description:

The proposed improvements would consist of erosion protection where Alligator Bayou discharges into Bayou Manchac, demolition of an undersized 8’ x 8’ box culvert, installation of a double 8’ x 8’ reinforced concrete box culvert with automatic controlled flood gates and operators, construction of a water access ramp to Alligator Bayou and Bayou Manchac to allow for access for maintenance and clearing of debris from the improvements, and construction of a control tower and related scada communications equipment and auxiliary power generator for operations of scada and automatic gate closure equipment in times of local power outages. The auxiliary power generator would be sized to handle small horsepower motors that drive the gates for lifting and for control panel and scada operation. The generator would be diesel and have a rating of 10 kW.

Activity Description:

During Hurricane Gustav/Ike, the areas near the Price Street Drainage Canal were inundated with storm surges causing overflow, bank erosion and bank collapse due to high velocity floodwaters, and slow conveyance of the water out of the drainage area for relief. The erosion is an ongoing problem and is causing channel instability and encroachment onto adjacent properties. Installation of revetment will increase flow, decrease ditch erosion by adding side slope stability and reduce frequent maintenance as well as protect the area against future storm events and disasters. The proposed improvements are designed to eliminate flow restrictions along and adjacent to the impact area.

Location Description:

Price Street, Plaquemine, LA 70765

Activity Description:

The proposed improvements are designed to mitigate flooding in the City of

Plaquemine similar to what occurred during Hurricane Gustav/Ike. The revetment or slopping will

provide bank stabilization and will ensure increased flow during future storm events, relieving the

City of flooding and erosion, alleviating current maintenance issues, and ensuring the health and safety of the residents. IbervilleParish'sHazard Mitigation Plan (2010) contains flood control as a

high priority and the proposed Project will mitigate localized flooding around the channel.

Location Description:

Sherwood Drive, Plaquemine, LA 70765

Activity Description:

The Rosedale Drainage Improvements Project will serve the residents who live in the Village of Rosedale, between Shady Lane and Highway 76. The unnamed Drainage Basin is drained by a large open channel earthen ditch located between a subdivision and Highway 76 in the Southwest section of Rosedale. The drainage basin serves as a major drainage lateral for the village. In its current condition, the canal has issues such as erosion, encroachment into adjacent properties, and it is inefficient for large rain events, such as those associated with Hurricanes Gustav and Ike. The existing side slopes also prevent routine maintenance and mowing by parish personnel. Herbicides currently used to control vegetation along the existing canal has resulted in further erosion problems by killing all vegetation that may aid in stabilizing the existing canal side slopes.

Location Description:

Augusta Street, Rosedale, LA

Activity Description:

This drainage lateral was one of many throughout the Parish that was flooded and severely eroded which hampers drainage conveyance producing large runoff as was experienced during Hurricanes Gustav and Ike. The drainage basin serves as a major drainage lateral for the Town. In its current condition, the canal has issues such as erosion, encroachment into adjacent properties, and it is inefficient for conveyance of flows from large rain events. The existing steep side slopes also prevent routine maintenance and mowing by Parish personnel. Herbicides currently used to control vegetation along the existing outfall has resulted in further erosion problems by killing vegetation that tends to aid in stabilizing the existing outfall side slopes. Because of the very steep eroded side slopes, the Parish has determined that the outfall would better accommodate hydraulic flows and result in the resolution of on-going severe erosion, if the outfall was constructed with a subsurface piping system of catch-basins, pipes, and backfill.

Activity Description:

This project will provide a citywide benefit, which according to the 2010 U.S. Census, has a population of 8,534 persons, all of which are served by the City's water facilities. The City of Westwego consists of three (3) distinct CDP areas (CDP's 27100, 27200, & 27602). The residential population of Westwego resides in CDP's 27100 & 27200; CDP 27602 has developed as a commercial and industrial area, serving traffic on the Mississippi River. In a comprehensive review of 2010 U.S. Census data, it was found that that the City of Westwego has a low-to-moderate income (LMI) population of 5,474 residents, which constitutes a 64.1% LMI percentage.

Location Description:

419 Avenue A, Westwego, LA 70094

Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The Lafourche Parish Government, in collaboration with the Town of Golden Meadow, is requesting $580,000.00 in CDBG Disaster Recovery funding to cover the design and construction costs to expand emergency vehicle parking and enhance municipal emergency operations at the Golden Meadow Multi-Purpose Town Hall and Community Center. The proposed project will consist of:
Construction of an expanded concrete parking area with emergency outdoor lighting for mobilizing multi-agency and first responder vehicles, and
Construction of an approximately 50' x 80' s. f. building to consolidate on-site storage of emergency operating equipment and disaster recovery supplies including operating equipment, portable pumps, generators, and sand bags.
Prior to Hurricanes Gustav and Ike, the Town of Golden Meadow operated its municipal services from a single 1,200 s. f. building, which was damaged during the storms resulting in a failure to function by local officials to immediately mobilize emergency response operations within the community. In November 2010, a new 6,000 S.F. Town Hall including an "Emergency Operations Center" was completed utilizing $1.8 million in grant and loan assistance from the U. S. Department of Agriculture. The newly constructed Multi-Purpose Center and Town Hall houses most of the city's offices and serves as a critical link for emergency coordination and communication between the Town of Golden Meadow and both parish and state Offices of Emergency Preparedness and Homeland Security during emergency disaster declarations.
The Multi-Purpose Center currently lacks a concrete parking area capable of accommodating parking for emergency vehicles as well as a centralized facility where emergency operating equipment and supplies can be safely stored in preparation and response to future disaster events.
The design and construction of the improvements will be built in conformity with the Louisiana Uniform

Construction Codes, ADA handicapped accessibility, and local ordinances and building codes. Upon completion of the project, the improvements will be owned and operated by the Town of Golden Meadow.

Location Description:

107 Jervis Drive, Golden Meadow, La. 70357

Activity Description:

The project/activity is to construct a communications tower for Livingston Parish that will include Parish operations, the sheriff, 12 fire parish operations, 7 municipal governments, 911 and room for the Governor's Office of Homeland Security. Lower tower space between 200 and 350 feet would be available to lease to private interests, such as cell phone companies. The proposed communications tower is expected to be at elevation of 800 feet to 1,000 feet depending on the design and specified area of coverage. It will be constructed on land already owned by the parish adjacent to the sheriff's training facility.

Location Description:

Livingston Parish, Louisiana

Activity Progress Narrative:

Activity Description:

The primary focus of this project is the berm/plug/levee to be placed across the old, original, Southward route of Cypress Bayou, to prevent flood waters from traveling the original channel and flooding the airport. An earthen berm/plug/levee, will be constructed at the confluence of the re-routed channel, which runs Eastward and the original channel, which runs Southward. Stone riprap will be placed on the inside surface of the berm, to preventthe channel current from scouring the newly placed berm.

Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

This shall be a drainage project to facilitate drainage in Bastrop and portions of unincorporated Morehouse Parish. Please see the attached map, for the area to be served. The project is all or selected portions of Staulkinghead Creek, which begins just West of LA 3051 and our area of interest ends about Spyke Road. Lateral W-10 flows into Staulkinghead Creek. Staulkinghead Creek is designated as W-9, which is a major drainage channel for the region. Drainage-access easements may be required for construction of berms, access with heavy equipment and shaping.

Location Description:

9404 Carbon Plant Road, Bastrop, LA 71220

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

To construct and upgrade the parish-wide communication system. The current 800MHz system will provide for the addition of two repeaters, one in the north, in Innis, Louisiana and one in Livonia, Louisiana. The repeaters would be placed in the suitable locations and mounted on one preexisting tower and one newly constructed tower. The addition of these two repeaters will provide the coverage and redundancy needed to ensure effective operations of vital infrastructure.

The project will provide the parish with upgraded consoles at the Pointe Coupee Parish Sheriff's office (PCPSO) allowing them to also operate on the 700MHz system installed by the Louisiana State Police. The improvements will also include upgrades to current software and hardware allowing the PCPSO to provide dispatch capabilities on both the 700 MHz and 800 MHz systems. The two frequencies and multiple tower repeaters will provide the Parish with increase capabilities to maintain radio communications during a catastrophic event.

Location Description:

Across Pointe Coupee Parish, LA

Activity Description:

The proposed units will have parish-wide impact waste on cooperative endeavor agreements between Sabine Parish Police Jury and the three fire districts in the parish whereby the equipment will be titled, insured, equipped, controlled, and maintained by the three fire districts, in order to provide immediate and more efficient responses when needed. The vehicles will accommodate the transportation of tools and equipment necessary for emergency response and will be available for use by any of the three fire districts either singularly or in combination. The vehicles will be available to assist the municipalities contained within the boundaries of Sabine Parish as needed. The vehicles will represent a tremendous asset that will be available to all the residents of Sabine Parish. Based on the nature of the project, there will be no income generated from the project or its use.

Activity Description:

St. Bernard Parish Government has revised their Long Term Recovery Plan to include the completion of a Comprehensive Master Land Use and Zoning Plan for the entirety of St. Bernard Parish. The Plan will address land use with the direct goal of successfully re-developing the Parish with an emphasis on economic development and supports sustainability.

The Comprehensive Master Land Use and Zoning Plan will contain a Fair Housing component that will not only guide housing development but will also assist and guide government and the community as to fair housing opportunities throughout St. Bernard Parish. The Comprehensive Master Land Use and Zoning Plan will also embrace floodplain and wetlands management in St. Bernard Parish, as well. The Comprehensive Master Land Use and Zoning Plan will serve as a policy framework for a wide variety of decisions concerning land use, infrastructure, commercial/industrial, institutional development and fair housing opportunities, design, capital outlay priorities, environmental issues, and growing commerce.

The Comprehensive Land Use Plan will incorporate strategies to implement the land use patterns promoted through the recovery planning process and depicted in the work developed by Duany-Plater-Zyberg (DPZ) and Waggoner and Ball Architects. These plans have created Post-Katrina land use issues for the Parish. Combining these visionary elements into modern comprehensive plans and zoning regulations conforming to the promotion of fair housing is crucial step.

St. Charles Parish	$129.00	$4,785,220.00
Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The Parish is proposing the construction of a new multi purpose community center on Sugarland Parkway in Luling, LA. Following Hurricane Gustav, the need for a centralized location for the provision of public services, particularly those targeted to LMI, became much more apparant. In an attempt to address these needs, St. Charles Parish intends for the construction of a facility on the westbank to accommodate the location of much needed service providers.
In conjunction with 45DRLG7001 - performance measures reported in 45DRLG7001.

Location Description:

St. Charles Parish, LA

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed. Adjusting entry for a previous quarter to clear one flag.

Activity Description:

Officials from Gramercy identified three phases of work in order to prevent flooding of homes within the town. Phase One will consist of opening, diverting, and improving segments of each canal as needed to improve the overall drainage capabilities of these canals. Phase Two would require installing the proper sized culverts on David Canal to eliminate restrictions of flows at the existing undersized culverts. Phase Three will involve the installation of flood gates at the outfall of one or more of these canals to prevent back flooding.

Location Description:

Gramercy, La. - St. James

Activity Description:

This program is designed for the purpose of providing incentive and resources for individual homeowners to repair or rebuild their damaged properties for the purpose of retaining community value and avoiding blight. The program includes elevation and mitigation incentives to assist homeowners rebuild safer, smarter, and stronger. The program includes incentives for green building and energy efficiency. Eligible home repairs could include installation of storm windows, storm doors, storm shutters, etc. It is expected that these home improvements will keep homeowners' properties up to the minimum levels of health and safety during the hurricane season. Through the use of 100% of these funds, the properties assisted will be able to fare better in future storm related disasters. All the properties served by this activity are residential.

Location Description:

Throughout St. John the Baptist Parish, LA

Activity Description:

The Parish is proposing to replace the existing pier with a longer walking pier that extends over the current rock jetty. No structure presently exists over the jetty; therefore work would consist of installing support pilings, railings and deck boards over the entire length of the rock jetty. The existing channel must be cleared to remove any silt and the final task is to install appropriate channel marking lights for safer boat launch area ingress and egress.

Activity Description:

Create housing program in Operlousas, St. Landry Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. Teh assistance will have the objective to return individuals to decent, safe and sanitary conditions.
'Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over $8.5 billion for the Road Home program; additionally $850 million dedicated to mitigation activities ($750 through HMGP and $100M through CDBG) for a total of approximately $9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned $850 million plus $879 million that have gone to Road Home elevations plus $880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of $2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

Activity Description:

This Fire Equipment project is for an aerial apparatus which is an important element of fire fighting capacity at the multi-story buildings industrial facilities (refinery) and the lumber mills. The new aerial apparatus would have a reach of eighty-five feet (85'), have a 1,500 gpm pump, have the capacity to seat six (6) firemen. This fire equipment will have a positive impact on the fire insurance rating of the City. The primary function shall be rescue or extended reach and for overhead water application.

Activity Description:

During Hurricanes Gustav and Ike Disasters, the operations and capabilities of the Mayor, City Clerk, City Administrative Staff, Police, Fire and Utility Departments were severely hampered due to the lack of adequate alternate power as a result of extended electrical power outages experienced in Opelousas. The City's major operations are housed in the Municipal Plaza Building to provide coordination of emergency services and other disaster related assistance to the local community. These efforts include assisting citizens, distribution of bottled water and supplies and other governmental activities to those in need. Without an adequate source of power at the City's Municipal Plaza Building during periods of power outages, the City will be unable to provide these services in an efficient manner.
To mitigate the problems experienced with the power outages in Opelousas, the installation of a standby generator capable of providing power to the Municipal Plaza Building is proposed. The generator will be sized (one 250 KW diesel generator) to be capable of providing the necessary power to operate the Municipal Plaza and the generator will be installed at the rear of the Municipal Plaza Building on the west side, adjacent to the existing electrical services. The necessary wiring from the generator to the existing services will be installed below ground in the conduit in accordance with current codes and regulations. There are two electrical service entrances to the building (from the power company) and thus two (2) automatic transfer switches will also be provided (which is more economical than redoing the services to the building) which will automatically start the generator and provide backup power to the building in the case of

the loss of power from the utility company.

Activity Description:

Flooding and high wind related problems(i.e. power outages, downed trees, damaged roofs, broken windows, etc.) existed throughout the Parish. These problems identified numerous failures and the St. Landry Parish Government has been awarded $1,037,566.00 of federal financial assistance under the FEMA Hazard Mitigation Grant Program (HMGP) to retrofit twenty-six (26) critical facilities in the Parish. The HMGP Program requires a local financial match of twenty-five percent and St. Landry Parish Government desires to utilize CDBG funds under this PIRP Program for this match.

Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The installation of a standby, gas generator capable of providing power to the Municipal Complex Building is proposed. The generator will be sized to be capable of providing the necessary power to the Municipal Complex, Police Department, Fire Department and Utilities Department. The generator will be installed at the rear of the Municipal Complex Building on the south side, adjacent to the existing electric service. The necessary wiring, from the generator to the existing service will be installed below ground in the conduit in accordance with current codes and regulations.

Location Description:

224 East Railroad Avenue Palmetto, LA 71358

Activity Description:

The drainage system presently consists of a small meandering open ditch system. During significant rainfall events such as Hurricane Gustav, the runoff generated exceeds the capacity of the undersized ditch system, causing flooding and erosion of adjacent property. To mitigate the drainage problem, the undersized open ditch system will be replaced with an underground storm drain piping and catch basin system of greater capacity.

Activity Description:

To mitigate these drainage problems that were evident for Hurricane Gustav, the capacity of the drainage system will be increased. Of the total to be replaced, nineteen (19) are currently undersized and will be replaced with larger pipes. Many of these also have other defects such as separated or broken joints or were installed at an improper grade. The remaining twelve (12) culverts are being replaced in order to eliminate a noted defect that prevents the pipe from functioning properly, eight (8) of which are damaged (partially or completely collapsed) or have separated joints and the remaining were installed at an improper grade. A total of 1,142 feet of 24" and smaller culverts/cross drains will be replaced with new properly sized culverts at the proper grade. Adjacent roadway ditches will be excavated to the proper grade by the Town as necessary.

Activity Description:

This project will improve drainage in two aspects for the Town. The first improvement shall consist of replacing an existing cross drain (2 -
36” x 40'Reinforced Concrete Pipes) on Corso Street. The existing drainage structure is inadequately sized for major storm events, causing backups and flooding upstream. Large storm events, including Hurricane Gustav, have alsocaused the roadway’s subbase to severely erode over this cross drain, and the failure of the roadwaybase and surfacing is imminent. The existing drainage structure will be removed, and a larger replacement drainage structure (2
48” x 50’ Plastic Culvert Pipes) is proposed for this site to provideincreased drainage capacity. Flexible revetment placed on each end of the replacement structure isalso proposed, in order to prevent future erosion.
The second improvement shall consist of installing subsurface drainage (180’ of 48” plastic storm drain pipes and 3 concrete catch basins) in an existing open channel which is severely eroded. The channel is located behind a Town park on Prescott Street. Large storm events, including Hurricane Gustav, have caused large volumes of water with extremely high velocities to severely erode this drainage canal. The only method to prevent further erosion is to pave the existing channel with concrete or install storm drain pipes. The proposed subsurface drainage would begin at a cross drain on Hill Street and extend to a cross drain on Prescott Street.

Location Description:

Corso Street & Prescott Street Washington, LA 70589

Activity Description:

This project will include a comprehensive approach to improve drainage in three locations for the Town that failed during Hurricane Gustav.
The first improvement (Project A) shall consist of replacing an existing cross drain (48" x 30' Reinforced Concrete Pipe) on Burton Street. The existing drainage structure is inadequately sized for major storm events, causing backups and flooding upstream. Large storm events, including Hurricane Gustav, have also caused the roadway's subbase to severely erode over this cross drain, and the failure of the roadway base and surfacing is imminent. The corrective course of action is the existing drainage structure will be removed, and a larger replacement drainage structure (2-48" x 40' Plastic Culvert Pipes) is proposed for this site to provide increased drainage capacity. Flexible revetment placed on each end of the replacement structure is also proposed, in order to prevent future erosion.
The second improvement (Project B) shall consist of replacing an existing cross drain (48" x 32' Corrugated Metal Pipe) on Second Street. The existing drainage structure is also inadequately sized for major storm events, causing backups and flooding upstream. Large storm events, including Hurricane Gustav, have also caused the roadway's subbase to severely erode over this cross drain, and the failure of the roadway base and surfacing is imminent. The corrective course of action is the existing drainage structure will be removed, and a larger replacement drainage structure (2-48" x 40' Plastic Culvert Pipes) is proposed for this site to provide increased drainage capacity. Flexible revetment placed on each end of the replacement structure is also proposed, in order to prevent future erosion.
The third improvement (Project C) shall consist of placing flexible revetment at an existing cross drain (48" x 28' Corrugated Metal Pipe) on First Street. Large storm events, including Hurricane Gustav, have caused the some erosion near the entrance and exit of this cross drain, and the failure of the roadway base and surfacing is in danger if these areas remain unprotected. Flexible revetment placed on each end of the replacement

structure is proposed, in order to prevent future erosion.

Activity Description:

The purpose of this project is to: 1. Installing PVC sheet piles with the top elevation at +6.0 NAVD along the outer bank of the drainage canals,
2. Installing one new roller and/or hinged type floodgate,
3. Installing one new drainage pump station with two pumps and a generator,
4. Repairing the existing canal banks in some areas,
5. Repairing the existing drainage pump station,
6. Removing the existing drain pipes from the outer canals and installing new pipes to allow the storm water to be directed toward the drainage pump station,
7. Installing a berm on the western edge of the subdivision to prevent storm water from entering the western edge of the subdivision.

Location Description:

Stephensville, La. - St. Martin

Activity Progress Narrative:

The purpose of this activity change is to de-obligate $3,563,989.22 of CDBG funds and return them to the State G/I Program. As a result of multiple problems, but through no fault of the Parish, the project was not able to move to the construction phase. The budget and obligation have been changed from $3,900,439.22 to $336,450.00 and the National Objective has been changed from UN to N/A and the Activity Type has been changed from Rehabilitation/reconstruction of Public Facilities to Administration.

Activity Description:

It includes funds to address levee enlargement and construction will consist of compacted earthen embankment, aggregate access roadway, seeding, fertilizing, etc. Also included in this project are improvements to Pump Station #8. The work to be performed at pump station #8 will be required because the levee crosses the pump station discharge piping and separates the suction basin from the discharge basin. When the levee is enlarged/widened it will be required to stabilize the levee slopes on each side to prevent sloughing into the suction and discharge basins. Stabilization will be accomplished by using stone/rip-rap, sheet piling and/or lengthening the discharge pipes. The pump station access walkway also ties into the existing levee so it may require relocation to accommodate the levee enlargement.

Location Description:

Hwy 90 E, Morgan City, LA 70380

Activity Description:

This Franklin Drainage Improvement project consists of the construction of a new storm water pump station, in addition to, reshaping a drainage lateral that will drain to the proposed structure for flood relief to the Florida Street, Treuil Street, Hope Haven, 6thStreet, 7thStreet and 9thStreet vicinities within the City of Franklin, St. Mary Parish, Louisiana. This project will require land acquisition near the existing Willow Street bridge for placement of the storm water pump station. The St Mary Parish Government is aware that the project involves acquisition and certifies that all URA requirements will be followed.
The construction of the proposed storm water pump station is inclusive of the following: (1) clearing and reshaping a drainage lateral that would drain to the proposed structure, (2) additional excavation for the placement of a concrete inlet sump, concrete outlet channel and rip-rap material, (3) installing sheet piles at the banks of the canal as required on the inlet and outlet sides of the pump station, (4) placing embankment material as needed for the foundation of the pump station and as backfill behind sheet piling, (5) constructing a concrete inlet sump and outlet channel, (6) constructing a trash rack system at the inlet basin sump, (7) constructing a pump house including a concrete floor on pre-cast concrete piles, pre-engineered metal building and electrical, (8) installing pumps, motors, controls, piping, check valves, electrical, etc., (9) placing geotextile fabric and rip-rap to protect the banks from erosion, (10) and all other incidental work necessary to complete the project.

Activity Description:

The 450 foot communications tower will be constructed of hot-dipped galvanized solid steel rods to eliminate internal corrosion. Any evidence of corrosion can be easily identified and corrected during routine inspections, without the use of specialized metallurgy equipment. The radio tower is designed to support a minimum of four 8-ft microwave antennas, to be located between the levels of 300 and 350 feet. Three microwave antennas, repeaters and supporting equipment are needed at this time to support the 14 fire protection districts, Sheriffs' Offices, 7 municipal Police Departments, 2 EMS (ambulance services) and STPG Office of Homeland Security and Emergency Preparedness. The planned space allocation of one more microwave antenna will support long-term network expansion.
The tower will incorporate state-of-the-art lightning surge and electrical grounding protection systems designed to protect sensitive communications equipment from transient damage.

Activity Description:

100% of the funds of this activity are intended to go towards providing assistance for elevation of residential properties in Terrebonne Parish. Terrebonne Parish is located on the coast of Louisiana and many parts are especially prone to storm surge and flooding when a storm related disaster hits on or near the state's coast. Elevation provides a means to mitigate future flooding potential of residential properties. Under the "Disaster Recovery Enhancement Fund Activity Eligibility Guidance" provided by HUD and dated June 22, 2010, elevation costs related to residential structures are specifically listed as an eligible activity for DREF consideration as this activity is considered an Individual Mitigation Measure.

Location Description:

Throughout Terrebonne Parish

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

Provides for drainage and flood protection for residents and their homes of Ward 7 in Terrebonne Parish
The specific purpose of each of this project is to reduce the risk of flooding in the newly protected areas. This will be accomplished either through raising levee elevations, improving pumping capacity, or some combination of the two. Raising levee elevations improves the protection of the areas against storm surge and tidal inundation. Improved pumping capacity reduces the risk of flooding from rainfall within the levees.
The parish of Terrebonne has compiled further analysis of this activity. Through analysis of the HUD study area; parcels, addresses and aerial imagery were loaded into a map document. Addresses were selected using the HUD study areas and were queried for property types – public, commercial, and residential. The parcel layer for this study was queried to located adjudicated properties and aerial imagery was used to examine the adjudicated properties for the presence of a structure. The results of the study showed that 98.4% of the structures within the benefitting area are residential.

Activity Description:

Foundation Repair Program-
100% of the funds of this activity will go towards providing assistance for elevation of residential properties in Vermilion Parish. Vermilion Parish is located on the coast of Louisiana and many parts are especially prone to storm surge and flooding when a storm related disaster hits on or near the state's coast. Elevation provides a means to mitigate future flooding potential of residential properties. Under the "Disaster Recovery Enhancement Fund Activity Eligibility Guidance" provided by HUD and dated June 22, 2010, elevation costs are specifically listed as an eligible activity for DREF consideration as this activity is considered an Individual Mitigation Measure.

Location Description:

Across Vermilion Parish, LA

Activity Description:

The project proposes to upgrade the existing pump station in order to more quickly and efficiently remove stormwater from within the subdivision. The pump station upgrades will include increasing the capacity of the pump station wet well, larger intake and discharge structures, and a 60 KW diesel driven standby emergency generator to provide continuous pumping in the event of a power outage during a storm. The proposed improvements will significantly reduce future flood damages and increase flood protection for this high risk area of the parish.

Activity Description:

Vernon Parish is expected to receive a significant growth in population as the US Army expands Fort Polk by more than 100,000 acres. As part of the its Gustav/ Ike recovery program and in partnership with the Defense Base Closure and Realignment Commission the parish is developing its first comprehensive plan, in an effort to focus new residential growth in less flood prone areas, assess current and identify future capital projects needs, and ensure that the commercial development is focused on infill and brownfields sites.

Activity Description:

The Parish and the Towns of Port Allen, Brusly, and Addis propose to install approximately thirty-six (36) generators of varying sizes throughout the Parish. Approximately twenty-nine (29) Parish generators will provide back-up power to sewage lift stations that failed to function as designed after losing power during the storm. Port Allen will install approximately three (3) emergency generators that will prevent equipment failures at the City's main water well, sewage lift station, and wastewater treatment plant. The Town of Brusly will install three (3) emergency generators with which to power sewage treatment facilitiesduring future storm events, and the Town of Addis will install approximately one (1) emergency generator with which to provide power to its treatment plant during future storm events.

Location Description:

880 N. Alexander Avenue, Port Allen, LA 70767

Activity Description:

West Baton Rouge Parish proposes to complete drainage upgrades from Louisiana Avenue to Rosedale Road which will direct future storm waters to three existing diversion canals located along LA Highway 1. In addition to improving drainage, the project will improve evacuees' access to a major north/south evacuation route by preventing roadway flooding. This project also will include an engineering study to determine if additional work needs to be done on Louisiana Avenue west of LA. Hwy. 1 at the intersections of: The North 11th Street right-of-way on the north side of Louisiana Avenue, North 12 Street, Johnson Street, Franklin Street, and Eleanor Street.

Activity Description:

To build a diversion canal. The Parish is experiencing flooding along the upper reaches of the Port Allen Canal. This drainage system appears to drain to all of the area along La Hwy 415 and the Commercial Drive Business Park. It is the desire of the West Baton Rouge Council to improve this drainage system by diverting the majority of its flow more directly into the Intracoastal Canal. The Port Allen Canal drains into Bayou Choctow and ultimately into the Intracoastal Canal. However, the confluence of the Port Allen Canal and Bayou Choctaw is approximately 5 miles further east from where the diversion planned in this project is designed to occur. This will allow the flow from the Port Allen Canal to reach the Intracoastal Canal faster and ultimately allow this system to drain better. This will provide relief for the homeowner's and businesses located throughout this area.

Activity Description:

The Parish proposed to fix two roads, Warren and Hawsey Roads. These roads were flooded and severely damaged during Hurricane Gustav. Road beds were saturated with water over the roads which caused deterioration of road's surface and road's shoulder. Warren Road is two miles in length and Hawsey Road is one mile in length. The Police Jury intends to improve these roads with the use of force account and keep all the necessary records. Grant funds will be used for materials and labor. (Follow State bid laws for materials). The Parish has extensive experience with the construction methods to be used to fix these roads. The road beds will be scarified and compacted to 12 inches thick base. The Parish will use #7 stone and follow this with asphaltic treatment. Approximate construction time will be ninety days. When this project is completed the citizens will be able to come and go to their homes no matter the weather conditions. There are a total of 12 occupied homes on the roads with thirty two persons living on the roads, 87.5% of the citizens benefitting low/mod income.
The road improvements were 15,840 linear feet.

Activity Description:

The proposed activity will include expanding an open swale ditch by extending and re-routing to avoid discharging local storm waters into the Hardwood Subdivision. These improvements will divert substantial amounts of water towards existing drainage outfall (No Name Creek).
The remaining activity will be to improve existing open drainage and culverts within the Subdivision to accommodate local rains as well as Hurricanes that have flooded this community starting before Storms Katrina and Gustav. As part of this undertaking, approximately Twenty-Five (25) culverts will need to be enlarged to insure adequate flow thus preventing headwaters from inundation of streets, property as well as homes.
Proposed improvements will be accomplished within public right-of-ways and not property will be acquired.

Activity Description:

Phase Two will use the balance of funds, within the Target area, to further reduce flooding conditions. These improvements will consist of removal of drainage obstructions within the sub water sheds of the area. Engineering budgets indicate that as many as one hundred and eighty seven culverts can be replaced, improvement to internal drainage within Hardwood and Turner Subdivisions as well as re-direction and improvement for some open ditches. These improvements are constant and in support of Phase One national objective as outlined by application.

Location Description:

Hardwood-Solitude-Turner, W.Feliciana, LA 70775

Activity Description:

The proposed activity is designed as a mitigation plan, with a proper power source being available at both Collin's Camp site and the Bryan Kelley Road well site.
The West Winn Water System, located in Winn Parish, provides potable water to 560 households and 27 businesses. The system serves residences along US Highway 84, US Highway 71, the Saline Lake area, and the St. Maurice area. During and following Hurricane Gustav, the system was out of service for three (3) days due to the significant power outages. The West Winn Water System does not currently maintain sufficient equipment and infrastructure at a single site. Therefore, emergency power systems are proposed at two (2) of the systems high capacity stations.

Activity Description:

§ Standardized Incentive Program is targeted at homeowners that suffered flood damage as a result of the storm, but didn't have flood insurance because they weren't in a flood zone. Awards will be disbursed in a two tier approach:
· Applicants willing to reoccupy homes within the area that received the most damage will be eligible to receive an upper tier award in the amount of $18,000.
· Applicants that choose to reoccupy homes outside the most affected area, but within city limits will be eligible to receive a lower tier award in the amount of $9,000.

Activity Description:

The state is required to spend at least 10.6 percent ($46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

Activity Description:

The state is required to spend at least 10.6 percent ($46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

Location Description:

Terrebonne Parish

Activity Description:

This program, which will be available in all of Louisiana’s declared parishes, will use flexible low interest loans to provide capital financial assistance to agri-businesses that meet the program guidelines and criteria as defined by the Authority. With a limited amount of funds available for this program, agribusinesses must be able to demonstrate how they contribute to the local and regional economy in the area where they apply for the program. Agri-businesses must provide jobs not only to their own business, but support, retain and create jobs locally; and, it must be determined to have a viable business operation in a post-storm economy meeting the guidelines shown below. The program will provide loan requests of up to $250,000 per entity with flexible repayment terms of up to ten years.

Location Description:

Producers in Louisiana that suffered 2008 farm losses due to either Hurricane Gustav or Ike and whose losses have not been fully remediated by other USDA insurance, or other disaster programs.

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

This program will use flexible low interest loans to provide capital financial assistance to agri-businesses that meet the program guidelines and criteria as defined by the Louisiana Office of Community Development, Disaster Recovery Unit and Louisiana Recovery Authority. Agri-businesses must be able to demonstrate how they contribute to the local and regional economy in the area where they apply for the program. Agri-businesses must provide jobs not only to their own business, but support, retain and create jobs locally; and it must be determined to have a viable business operation in a post-storm economy. The program will provide loan requests of up to $250,000 per entity with flexible repayment terms of up to ten years. Parishes will be grouped into eight geographical regions with $10 million made available to the regions based on each region's proportional share of agriculture losses. Agri-businesses, some of which include aerial applicators, licensed commercial crop storage facilities and elevators, cotton gins, ground chemical applicators, custom harvesters, farm supplies merchant wholesalers, agriculture management consultants, rice dryers, Restricted Use Pesticide dealers, and veterinarians engaged in large animal or farm related veterinary activities, are defined as individuals or organizations that provide support activities, products, or services directly to agriculture producers.

Location Description:

Agri-businesses in all Louisiana Parishes.

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments.

Changed back to Completed.

Activity Description:

The primary goal of the Delcambre Fishery Recovery Project is to create/maintain employment in the commercial fishing industry and preserve the commercial commercial fishing culture of coastal Louisiana by providing the commercial fishermen with a means to sell thier catch at higher than wholesale market prices. This venue, which does not exist anywhere else in the area, will increase retail business within the community and create an attractive incentive for the commercial fishermen.

Activity Description:

The proposed project site for this Coastal Communities Fisheries Recovery Program application is the Greater Lafourche Port Commission's Nerby Collins Commercial Fisherman's Marina located at Port Fourchon. The Nerby Collins Commercial Fisherman's Marina provides dock space and shore power free of charge to commercial fishermen. The marina is in need of bulkhead improvements for the dock space provided to commercial fishermen. This project would include the installation of approximately 514 linear feet of vinyl sheet bulkhead with wood bumpers for use by fishermen with small to medium size vessels.

Location Description:

239 A.J. Estay Road, Port Fourchon, LA

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

The creation of the New Orleans Arena Seafood Pavilion Educational Outreach Program, will meet urgent needs by supporting local Louisiana shrimpers and fishermen as well as their Gustav and Ike affected parish economies. The Pavilion will provide an opportunity to rebuild Louisiana's critical commercial fisheries industry by highlighting impacted parishes and contributing to the restoration of the state's indispensible 3.2 billion dollar fishing economy by educating the public in the safety and recovery of Louisiana's fisheries. The Pavilion will maintain employment in the commercial fishing industry as well as aid in the imperative preservation of the commercial fishing culture of coastal Louisiana.

Location Description:

New Orleans Superdome Arena

Activity Description:

Plaquemines Parish proposes to use its Gustav/Ike Sustainable Fisheries Grant Allocation of $900,000 to mitigate the Buras Boat Harbor Site in order to provide permanent site improvements that will create capacity for current and future fisheries programs. Site improvements will consist of the following:

- Four hundred (400) linear feet of bulkhead and concrete dock
- Access to electricity and water will be set up on the dock so any vessels or equipment needing these services can have access quickly and be used to its highest efficiency
- Grading will be performed on the property to level the ground
- Limestone will be added to create a better road and working surface
- An eight foot (8) tall, two hundred and sixty two (262) linear feet, chain-linked fence will be erected to make sure security measures are in place.

Location Description:

Buras Boat Harbor Road, Buras, LA 70041

Activity Description:

This project involves the construction of a new bulkhead to replace the existing dilapidated bulkhead along the shore of Lake Pontchartrain at the mouth of the Tchefuncte River. The bulkhead's purpose is to protect an existing public recreational area which serves the Town of Madisonville residents, as well as, those from surrounding towns and parishes. The recreational area includes a road, parking lot, two boat launches and fishing docks. Due to the collapse of the existing bulkhead these facilities are threatened by wave action and land loss from storms, hurricanes and simply a strong southeast wind which pushes the lake waters in. These recreational facilities have been damaged or washed out by a number of hurricanes over the years, including Katrina, Gustav and Ike. After such an event the site can remain unusable for quite some time. Construction of the new bulkhead would provide protection now, and in future years, and assure continued access to Lake Pontchartrain and the Tchefuncte River for recreational purposes.

Location Description:

Madisonvile, St. Tammany Parish, Louisiana

Activity Description:

The goal of the project is to redirect effluent from the City’s sewage treatment plant (principally the Sunshine WWTP) from discharge into a slow draining and often times stagnant local coulee, instead pumping the discharge over the levee into the Mississippi River. This redirection of WWTP effluent to a major water body, from the much smaller local coulee or drain, will eliminate the problem that occurred during Hurricanes Gustav and Ike where sewage effluent was being discharged into flooded drainage ways. The effluent was dispersed wherever floodwaters flowed.
The local drain where effluent is currently discharged is a slow draining channel on the best of days. When wet weather season occurs or during major storm events such as Hurricanes Gustav and Ike, the drainage system often stops flowing downstream and actually flows backwards as a result of backwater flooding, in that the lower swamps begin to fill and the upstream drainage basin has nowhere to drain.
The effluent flow from the existing WWTP currently discharges into Bayou Paul, which is located adjacent to the existing plant site. This leg of Bayou Paul is very small and does not receive substantial flows from the surrounding areas to provide a steady flow. The Bayou also suffers from backwater flooding which results in the treated sewage effluent overflows ditch banks after heavy rain events occur, such as during Hurricanes Gustav and Ike. The rerouting of sewage treatment effluent to the Mississippi River will eliminate the problem of discharge into this local drain. The proposed routing for the new effluent force main will discharge directly to the Mississippi River, which will not only eliminate the potential health hazards of the nearby residential areas from overtopping of the Bayou, but will also reduce the effluent treatment requirements of the WWTP (i.e. discharge to large flow of Mississippi River).

Activity Description:

The Franklin Canal floods with every surge event. The hurricane related storm surge travels up the Franklin Canal and floods approximately 300 homes and U.S. Highway 90, a major evacuation route. The Franklin Floodgate Sinkable Barge and Pump Station will not only block the surge from traveling up the Franklin Canal, but the pump station will also prevent storm water from inundating the closed system. The proposed improvements are installing a sinkable barge as a floodgate, additional levees, and a pump station. The drainage area affected is approximately 600 acres. The proposed levee would tie into the USACE Franklin and vicinity levee. The proposed pump station and sinkable barge are both new construction.

Location Description:

Franklin, St. Mary Parish, Louisiana

Activity Description:

The proposed project will include building a levee between an existing (8-1) forced drainage levee, located in Ward 10, Terrebonne Parish, Louisiana. The earthen levee will have a 10 crown levee using haled in material, initially construction to an elevation of +9.0 Geoid 3 NAVD 88 with two flow control structures. The flow control structures would be equipped with 9 each 6 ft. x 6 ft. flap gates, with 5 foot walkway on top of the structure for access to the gates.

Activity Description:

Located in Vermilion Parish, the flood control structure will consist of a braced (double wall) steel sheet pile structure constructed from bank to bank across the Boston Canal just south of the Intracoastal Waterway. The central 100 feet of the sheet pile structure will be open to flow and vessel traffic and will have a structure which will consist of a sill just below the existing Boston Canal bottom with a sheet pile seepage structure constructed just below the sill structure This area has experienced flooding caused by tidal surges from tropical storms that originate in Vermilion Bay and travel inland through existing canals. These flood waters inundate homes and property causing substantial damage.

Location Description:

Erath, LA

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

This project proposes to reconstruct these streets with a full base repair utilizing pulverization of the existing surface and base, then cement stabilization and complete asphaltic concrete wearing course application. This project will provide safe, durable riding surfaces and prolong the life of the streets. These six streets in need of repair are as follows:
East Church Street from North Railroad Street to South Richard Street
East Main Street from North Railroad Street to South Richard Street
East Hickman Street from South Railroad Street to South Richard Street
Wilfred Landry Street from South Railroad Street to the dead end.
South Richard Street from LA Hwy 14 to East Hickman Street
Isadore Street from East Hickman Street to the dead end.

Location Description:

Delcambre, La.

Farmers Rice Milling Company, Inc.	$0.00	$1,000,000.00
Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The project is a Clean Rice Packaging Facility that will be added to the current milling facility at 3211 Hwy 397 S, Lake Charles, Louisiana. The improvements will allow Farmers Rice Milling (FRM) to increase output rates from the mill and eliminate slowdowns that result from the current packing, loading and storage system. FRM will be able to increase productivity of the packaging line by 50% and increase packing efficiency by 20%, or a downtime reduction of twenty (20) hours per week. The new packaging system will also allow more flexibility in packaging size, opening new markets to their products.

Location Description:

3211 Hwy 397 S, Lake Charles, LA 70615, Calcasieu Parish

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

The Parish is proposing the construction of a new multi-purpose community center on Sugarland Parkway in Luling, LA. Following Hurricane Gustav, the need for a centralized location for the provision of public services, particularly those targeted to LMI, became much more apparant. In an attempt to address these needs, St. Charles Parish intends for the construction of a facility on the westbank to accommodate the location of much needed service providers. In conjunction with 45PARA3201 - performance measures reported in this activity.

Location Description:

St. Charles Parish, LA

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

In April 2010, the Parish (St Tammany) was contaced by Associated Wholesale Grocers, Inc. of their interest to construct a 785,000 (sq ft) distribution center in Louisiana; with St. Tammany Parish being one of the sites of interest. With its total expected 246 permanent jobs and an additional 94 permanent jobs from associated companies, St. Tammany and Pearl River will be able to recover from its current economic status. In order for the Parish to accomodate the infrastructure improvements necessary for the location of the AWG distribution center, it will require an estimated $3.560 million to address sewer, water, drainage, fire protection, and road improvements. The Parish is seeking funding in the amount of $1,960,000 through the LCDBG ED Program for the sewer, water, drainage, and fire protection improvements. $1,600,000 for the road improvements are being requested through the OCD DRU Disaster Recovery Economic Revitalization Program.

Activity Description:

Our program to provide assistance to early-stage social entrepreneurs is called the New Ventures Accelerator. Social entrepreneurs at their critical early stages need support, mentorship, and strong networks in order to be successful.

· We begin with a strong selection model for high-potential entrepreneurs and ideas.
· We work with the social entrepreneur in a 10-month engagement to test and implement their promising new approach to solving a problem.
· We begin with an organizational assessment, which includes a financial, operational, and programmatic review.
· Together, we set and reach short- and long-term goals through our Milestone Activity Plan (MAP) for deep social impact and financial sustainability.
· We assemble a team made up of an Executive Consultant, Executive Mentor, and pro-bono technical assistance experts (legal, marketing, financial, etc.)
· Support occurs in areas such as building financial models, validating the market, strategic planning, business planning, setting up accounting systems, marketing, and fund development.

Activity Description:

The ability of a business to reopen after a disaster does not ensure long-term survival. Research shows that of the businesses that do reopen following a disaster, many fail within two to five years after recovery resources are exhausted. Small- and medium-sized businesses are especially vulnerable to disasters, as they often lack the resources required to meet the challenges and seize the opportunities created in the wake of the event. Those businesses operating in today’s post-hurricane and oil spill-impacted economy will require an extra measure of focused assistance to support their ongoing recovery. With this assistance the expected outcomes for business are higher survival and growth rates that will also result in expected outcomes of higher job retention and creation in our impact area.

Activity Description:

East Feliciana Parish's sewerage, water supply, gas supply and of course power supply were compromised. They have recognized the development of a Master Plan for the area as a priority for revitalization and resiliency from future disasters. A primary goal of the East Feliciana Master Plan will be the development of resiliency and sustainability. Using Smart Growth principles within the Plan they will provide a guide for Parish change, growth and resiliency for the next 20 years. The East Feliciana Parish Master Plan will include the following components: environment and natural resources, land use, preservation of agriculture and timber industry, transportation, infrastructure, economic development, diverse and affordable housing, recreation and parks, and historic and cultural preservation. The plan is to be an innovative community driven plan for safe, wise land use, infrastructure development, enforced zoning ordinances, and include strategic economic planning to strengthen revenue for resiliency implementation. Smart Growth principles are to be applied to develop the wisest use of the above components of the Master Plan.

Activity Description:

The purpose of the Water Management Strategy is to mitigate the risk of damage to people and property due to flooding, while concurrently maximizing the economic and social benefit created by investments in water-related infrastructure. In producing an Integrated Water Management Strategy, GNO, Inc. will focus on the issues of storm water, ground water, flood control, and subsidence management, while increasing economic growth, environmental quality, and public health and safety, by engaging in innovative, sustainable development planning actualized, in part, in the form of the WMS.
An important part of this project is the identification, creation, and costing of the preliminary designs for 3 distinct pilot projects. These 3 projects will delineate the guidelines, principles, and theories for introduction into the real world. They will be executed through the study of many tools that are available to the region. These tools include, but are not limited to: pervious pavement, rainfall capture basins, detention ponds, retention ponds, rain gardens, infiltration basins, bio-retention filtration systems, limited use of hardscape canals, pumping stations, natural waterways, existing drainage infrastructure, public spaces and parks, greenways, and vacant properties.

Activity Description:

For DREF purposes, this activity should actually by categorized under Category A alone and not Categories A and D. The initial activity description submitted in the DRGR was incorrect due to data entry error. The following is the correct description.

The City Planning Commission (CPC) encourages investment and redevelopment in safe, resilient locations, recognizing that much of the city's historic fabric occupies higher ground. Unfortunately, many of these historic neighborhoods and their commercial corridors are underutilized today. Louisiana Main Streets promotes revitalization of six of New Orleans' historic commercial districts providing a unique opportunity to capitalize on their program. The CPC therefore proposes the Main Street Resiliency Plan to leverage the institutional structure, capacity, and grassroots momentum of New Orleans' six Main Street organizations1. This proposed Plan will promote investment and redevelopment in resilient locations by:

creating a platform for individual Main Street organizations to better share experiences and learn from each other;

forging a two-way learning channel between grassroots Main Street organizations and city planners to inform a strategy to target future public investment; and

developing a model that can be extended to additional corridors in the future.

The new city Master Plan, which has been approved by the CPC and is now under consideration by the City

Council, specifically calls for re-establishing the City role in the New Orleans Main Street program, as part of work to revitalize neighborhood commercial districts2. The Master Plan strongly advocates for plans and programs to revitalize commercial corridors and incent development in resilient locations. The Main Street Resiliency Plan will advance the goals of the Master Plan through location-specific strategies and city assistance and coordination. Additionally, the Plan will benefit from being developed concurrently with the new Comprehensive Zoning Ordinance creating the potential to incorporate new standards and zoning incentives to support the Main Streets' resilient revitalization.

Activity Description:

The City of Pineville's zoning ordinance was written and developed in the 1960s and does not fit into the City's current development needs and goals. The City of Pineville plans on rewriting the current Zoning Ordinance into a Comprehensive Unified Development Ordinance. The new ordinance will include an expanded zoning and Subdivision Development Ordinance and a user-friendly Zoning map. The new code will incorporate FEMA Flood Hazard Maps, U.S. Corps of Engineer Wetland areas, environmental quality permit restrictions on steam discharges from packaged wastewater treatment plants, storm water runoff control, MS4 slit and erosion control measures, environmental concerns such as light and noise pollution, conservation resource areas to protect local streams and wooded areas, and historic preservation efforts.

Activity Description:

The intention of the Long-Range Development plan is to guide development in the City of Breaux Bridge so that it is more resilient to future disasters. The Long-Range Development will be created through the creation of new zoning ordinances guided by the planning process and examining the community's topographic and flood maps to learn what features can be improved on and/or mitigated. A great deal of these new ordinances will emphasize research conducted by FEMA relative to wind speeds and its effect on structures as a result of poor construction specifications, as well as flood-plain and soil-quality maps for developing new land-use ordinances .

Activity Description:

Repairing first responder communications infrastructure damaged by Hurricanes Gustav and Ike. LWIN, a complex two-way radio interoperable communications network, provides mission critical communications to more than 59,000 first responders accross the state. These improvements will greatly enhance the public welfare and the citizens of Louisiana will be better protected in the event of future floods or hurricanes.

Location Description:

Gustav Ike affected parishes

Activity Progress Narrative:

Changed status from Completed to Underway to be able to upload template to update accomplishments. Changed back to Completed.

Activity Description:

Cecil J. Picard LA 4 Program will provide high-quality early childhood education to children not enrolled in any other publically funded prekindergarten program and who are eligible to attend kindergarten the following year. The targeted population in these programs is children considered to be “at-risk” of achieving later academic success and children who are from low to moderate income families. The program utilizes research-based curricula and assessments to prepare children to enter kindergarten and to ensure they are ready for academic success.

Location Description:

The program will be located statewide and in all Gustav/Ike eligible parishes.

Activity Progress Narrative:

Activity Description:

Funding received through this program will help Southeastern increase its number of yearly graduates in its Computer Science and Information Technology
program. A recent Baton Rouge Area Chamber (BRAC) report predicts there to be an annual workforce shortfall of approximately 32 individuals in the
technology sector and BRAC expects there to be approximately 150 annual openings in the technology sector in the Baton Rouge area. Southeastern was
selected by LED as a university partner to help Louisiana meet its commitments under the agreement. Southeastern's main campus is located in
Tangipahoa parish. As a regional institution, Southeastern's feeder parishes are Ascension, East Baton Rouge, Jefferson, Livingston, St. Charles, St.
James, St. Tammany, Tangipahoa, and Washington Parishes. According to a report issued by the US Department of Housing and Urban Development
Southeastern's feeder parishes received damage due to Hurricane Gustav.

Activity Description:

Louisiana Economic Development (LED), in partnership with the Louisiana Workforce Commission (LWC), is developing a website designed to meet the talent recruitment needs of Louisiana employers. Louisiana Job Connection has been created to match companies with qualified job seekers using a unique matching algorithm. The site is also intended to create a favorable image of the state as a place to live and work amongst prospective job seekers. Louisiana Job Connection will help match the needs of large industrial projects with skilled workers, creating more high-paying job opportunities for employees while also accelerating economic recovery of those parishes impacted by the hurricanes.
